

# Compare Hyperbaric Chamber Brands

How to Buy the Best Hyperbaric Chamber

Hyperbaric  
central

CALL (512) 789-2788

## How to Buy the Best Hyperbaric Chambers – *Hyperbaric Central will explain*

How will you buy the best hyperbaric chamber? There are other places you can buy **oxygen chambers** online, but trust Hyperbaric Central for the best deals with sincere, honest service and widest selection of chambers that you can compare at the best prices. We'll help you before ... and *after* the sale. But what is the best chamber for you? I'm here to help you decide 😊

## Compare the Brands – *Hyperbaric Chamber Options*

Read on to learn the variations in quality and style of the different **oxygen chamber brands**, so that you can make an informed decision based on your needs: the style that suits you best and your budget.

**FYI: Only 3 Hyperbaric Chamber Manufacturers exist in the United States with FDA approval. Any other company that sells here in the US is not considered FDA approved. I represent two FDA approved brands: Newtowne Hyperbarics and Summit to Sea. Other Brands that show up on the internet other than Newtowne, Summit to Sea and O-yHealth are imported from China and often have American private label brand names. Please click and visit [Compare 1.5 ATA Chambers – Hyperbaric Central](#) for a further comparison on these imports.**

THANKS for allowing me to provide you with info! I do hope I can be of help! I'm honest, disclose all details for you, and don't hide or falsify information, which is sadly becoming evermore common in this industry.

My website is [www.hyperbariccentral.com](http://www.hyperbariccentral.com). Explore blogs, videos and articles in the research section. Look at it to see chambers to find the best one for your particular need, then come back to me with your questions! O2 concentrators are located under accessories on the navigation bar. You can watch the brand's demonstration videos. Find these under resources, under the title called 'manuals.'

Other ways that you can view and compare chambers on my site, would be to click the navigation bar under 'chambers,' and then locate chambers listed by brand or by size and price. I have posted several pics with each item for you to have the best best idea of size.

**Please contact me if you would like any specific information.**

## Please read these comparisons, then come back with questions *before you purchase:*

**Before you begin to compare chambers against one another here are some points.**

- Only 3 Hyperbaric Chamber Manufacturers exist in the United States with FDA approval. Any other company that sells here in the US is not considered FDA approved. I represent two FDA approved brands: Newtowne Hyperbarics and Summit to Sea. Other Brands that show up on the internet other than Newtowne, Summit to Sea and O-yHealth are imported from China and often have American private label brand names. Please click and visit [Compare 1.5 ATA Chambers – Hyperbaric Central](#) for a further comparison on these imports.
- So based on this benefit, you can also find out which brands FDA is reporting on for accidents or quality incidents. Note there is an FDA website called MAUDE that reports adverse event reports: accidents and incidents of chambers according to brand that is reported by owners for buyer awareness.

## Oxygen Concentrators

The optional oxygen concentrator is an add-on for all of the American brands. You want to have one that has a 10 liter-per-minute oxygen flow rate and, at the very least, a 10 psi backpressure (Devilbiss has 20 psi), in order to bypass the pressure inside the chamber (think car velocity vs against the wind). Read About [Oxygen Concentrators and compare concentrator brands](#). Two brands that meet the standard for hyperbaric chamber use are Drive Devilbiss DS1021 or Airsep Newlife Intensity 10. I recommend Devilbiss, because of its 3-year warranty (Airsep's warranty is 1-year).

The Chinese brand chambers all give you just a 5 liter-per-minute concentrator when you purchase their chamber, unless you pay more to upgrade to their 10lpm unit. Of course, that will cost you extra. They give you an "All-in-One system, which combines Oxygen Concentrator with Compressor and Dehumidifier. These have several problems because they run 3 separate operations at once, all in one unit making them inefficient at all activities. One of the problems are that the oxygen concentrator is only 70 percent pure oxygen, not the 95 that you receive with a separate concentrator.

## Compressors

The compressor is the motor that inflates your chamber. "The competitor" brags that theirs has the cleanest filters. But after research it was discovered, their compressor filters are .01 microns while Newtowne and Summit (which use the same compressors) are .003. What this means is that the competitor's compressors release through them 50 times larger particles than do the Newtowne and Summit chambers. Therefore, Newtowne and Summit refine and purify the air 50 times more.

Summit began using 2 compressors because they feel that if one compressor shuts down the other will continue to work. Also a brand which doesn't have an air release valve had an incident where a kid died inside, due to the chamber not deflating and so he breathed CO<sub>2</sub>. No one knew, so he passed away.

The idea is good, but the fact is, Newtowne, and Summit both have release valves. So if the compressor did quit, the chamber would deflate. You would know there's a problem. Summit does give an alarm free with purchase so you'd know too.

A second compressor is actually good if you're running a clinic. It would make it less work for one compressor. Newtowne offers 2 as well or a larger compressor.

The All-In-One compressor-oxygen concentrator-dehumidifier combination, which comes with the Chinese brand chambers (and all of its private labeled USA and international brands), uses 3 electronics running together on one plug. This causes extra stress on the one shared plug, which potentially could incite extra heat generation on that plug. And with the complexity of using 3 different devices all managed by one engine, the result is your chamber will run inefficiently (see oxygen concentrators). Potential outcome of using one bloated device for 3 different purposes: carbon dioxide build-up in the chamber, lower than optimal pressure, a lower oxygen-output percentage (70%).

## Chamber differences

### Price difference

**Competitor:** Approximate prices 21" = \$22,995, 27" = \$15,995, 32" = \$25,995 (base price with 5 year warranty. Mattress & Shipping cost extra)

**Newtowne Class:** 4: 27" = \$4,495, 34" Military ID = \$6,295 (with ID. However, **with me ONLY**, you can purchase this chamber at the military price with or without ID), 34" = \$7,495 (**I sell to everyone for military price = \$6,295**), 40" = \$10,995 (military = \$9895.50), 54" Walk-in = \$13,995 (free shipping for 27" & 34" chambers. The 34" & 40" include a mattress in the price. 2 year warranty that can be increased to up to 5 years)

**Summit To Sea Dives:** 26" Shallow Dive (NOW INCLUDES FREE MATTRESS) = \$6,995, (Military 26" Shallow = \$6,295), 33" Military Dive = \$8,095 (non-Military-without ID \$8,995), 40" Grand Dive = \$12,995, (Military = \$11,695.50) 40" Dive Vertical = \$12,995 (Military = \$11,695.50), 52" Grand Dive Vertical = \$16,995 (military = \$15,295.50) 60" 'wheel-chair friendly' Grand Dive Pro Plus = \$19,995 (military = \$17,995.50), (free shipping for all chambers except shallow dive. 26 Shallow, "33" Dive & 40" Grand Dive include a mattress. 2 year warranty that can be increased to up to 5 years).

**For a parent with a child, consider either 33" or 34" sizes, best for space for the two of you. Two adults can fit inside, but it will be tight.**

#### HOW DO YOU DETERMINE PERSONAL SPACE INSIDE THE CHAMBER?

Split your coffee table and sofa by the number of inch chamber you are considering (ie: 34"). Then lie down between your coffee table and sofa to determine if the space feels good to you.

**NEWTOWNE AND SUMMIT TO SEA ARE AS MUCH AS 1/4 OF THE PRICE OF THE COMPETITOR. You can purchase a superior-built 60" easy-entry Walk-In style Summit to Sea Chamber for far less than the 32" competitor's.**

### Chamber durability test

"The Cadillac" brand pressure-tests the strength of their chambers by pressurizing them up to 11psi. However, both, Summit to Sea and Newtowne test their chambers at close to double the pressure, giving you far more assurance of their chambers' strength and durability. Therefore, you can be assured the Newtowne and Summit chambers will NOT WEAR OUT or tear at the seams.

#### Zippers

The zipper closure on "Competitor" chamber utilizes 2 zippers with a urethane panel with a 'flap' to hold the zippers. That panel will, potentially, stretch with use and this stretching may cause you to have to manipulate the zipper to adjust it from the wear.

Newtowne Hyperbaric chamber is manufactured with 3 zippers that are held in place with a seam. So there's no manipulating the zipper as the chamber ages. Many people like the Newtowne because they use 3 ply urethane rather than 2 which makes Newtowne very durable. Newtowne uses a Superior zipper that won't require waxing and the zippers are exceptionally durable. Newtowne Superior zippers withstand the pressure of the chamber and prevent the pressure from impacting the material.

Other people prefer Summit to Sea's 2 zipper format because of the ease of closure. There is no need to maneuver to shut 3 zippers. Instead, you shut 4 car buckles on the outside, then zip yourself in. The Summit to Sea chamber has a simplified-closure 2 zipper, stable system protocol that also implements a set of 4 buckles. This zipper protocol makes getting in and out easy to do. This set up won't stretch and won't require future manipulation. Some people like the ease of Summit 2 zipper-buckle system. Summit chambers are built not to cave in above you if you get in on the side.

Newtowne is easier to zip from if set up with their opening at the top. Newtowne gives you a side option and top option to enter. Summit only opens from the side.

If ever your zippers need any repair keep in mind, Newtowne is the only company that will repair your zippers with the same machines they built your chamber with. The other brands use alternative methods. This means they won't end up like the original LIKE NEW CONDITION.

## The Newtowne Hyperbarics Chambers

[Click To View Newtowne Training Videos](#)

**SHIPPED ONLY TO AN USA ADDRESS - NO INTERNATIONAL.**

Newtowne has changed from their well-known blue color to a NEW BRIGHT WHITE material. Summit's color is more off-white or cream, while Newtowne's is now full-on white. No more blue.

Newtowne builds everything inhouse, from top to bottom, rather than hiring a manufacture to produce. The other's hire a specialized factory in NY. The advantage of self manufacture is you receive superior materials at a lower price, since there's no need of having to pay a middleman.

- Warranty is 2 years. The "Competitor" had been 1 year but in 2018 raised their prices to **build in a 5 year warranty**. From the words of previous Competitor customers, **the Competitor actually limits the number of repairs before refusing to repair their product**.
  - Both Newtowne and Summit to Sea offer the 5 year warranty but it is optional rather than building the price over the extra warranty (because the chambers rarely require repair). One thing to note is The "Competitor" **WILL NOT WARRANTY OR SUPPORT A 'USED CHAMBER'**.
  - Lengths of each Newtowne chamber are sized longer for extra space. Lengths are: 91" for the 27", 95" for their 34" and 105" for the 40".
  - Any future repair through Newtowne is less costly and finished in "brand new" condition since the chamber is repaired in-house. The wait-time is minimal, whereas if you have a repair with "Competitor" chamber, there will likely be a long wait (I have heard up to 4 months). They repair at a separate independent facility.
  - You receive steel frame, not PVC, so it won't warp over time. Frame is outside the chamber for extra interior space.
  - You get a 3 ply urethane vs 2 ply so less stretch potential and less wear and tear on the seams over time.
  - Their middle zipper is top notch. No greasing and it's specially designed to actually strengthen the chamber against the pressure to prevent wear and tear. No need to use grease.
  - Newtowne's 34" chamber includes an extra second auxiliary valve for a second oxygen concentrator. Summit has a single auxiliary valve.
  - Newtowne usually includes upgrades as part of the price (ie: Mattress). Shipping is always free for 34" and 40" chambers.
  - Newtowne has never, ever been reported in Maude's accident and incident report. Never had any unwanted surprises.
  - The greatest benefit is the window is a heavier acrylic that doesn't bubble out. If you think about pressure control, you need pressure 100% at every spot in the chamber, or else the pressure builds into places with things like the "Competitor's" bubbled out windows. This undo pressure inside a bubbled out window ultimately wears out seams causing ruptures, tears and worn out seams (see Maude report). Since the "Competitor" has often experienced tears in the seam (see Maude report), price for repair runs between \$1k and \$4k to repair and because it gets repaired out of house, there is a month or more wait time, and they will only repair their chamber one time.
- 
- Newtowne Chambers tend to be longer in length. 91" for the 27". 95" for the 34" and 105" for their 40".
  - Newtowne offers valve 2 ports on their 34" inch hyperbaric for a second oxygen concentrator, compared to 1 valve port on Summit's 33" Dive.
  - Newtowne includes an alarm that goes off if the compressor quits for safety.
  - Newtowne now includes a gauge so that you can see the pressure while inside the chamber

## Summit To Sea *(Chambers Now Available For Prompt Shipment!)*

[Click To View All Summit To Sea Training Videos](#)

**Many Clinics, worldwide recognize the Summit to Sea Brand.**

Summit's most unique chambers are their vertical chambers. Love the style. They are primo for clinics because people don't feel claustrophobic. They allow for multiple activities and therapies from IV therapy, surround sound therapy, light therapy to yoga and working out. They have a brand new 60" Grand Dive Pro Plus that offers versatility like never before – Wheel Chair access, full size Recliner-Lounge Chair ability, Lying down ability and much more!

[Click To See Vertical Chambers](#)

Summit to Sea dives, just like with Newtowne, offer the great acrylic windows that don't wear out.

- Summit uses a bright white material for a low claustrophobic feel.
- Summit is the only brand to include a **FREE CUSHIONED MATTRESS with the small size 26" size chamber as part of the price (along with all other size Summit chambers)**. Newtowne's economy 27" does not include this mattress. It would be a \$350 Add-on if desired (all of Newtowne's other sizes include the mattress).
- Many people like the clean white appearance and the way light can penetrate because it is semi-translucent. The chamber is brighter inside.
- Summit & Newtowne include an alarm that goes off if the compressor quits for safety.
- Summit includes an inside gauge so that you can see the pressure while inside the chamber. Summit is the only brand to include a **FREE INSIDE GAUGE with the small size 26" size chamber as part of the price**. Add-on with Newtowne's 27" only. All other Newtownes include the gauge.
- Summit, has developed an exclusive structural design, which makes their chamber lightweight along the top. This unique construction allows the weight of your chamber to not collapse upon you when you enter and and exit, making it simple to close without fighting against your chamber shell's weight.
- Summit offers 2 compressor / motors. Newtowne offers the second as an upgraded option for an upgraded price.
- All the chambers are 90" long.
- Summit to Sea is an international brand. They sell their chambers worldwide. Newtowne is USA only.
- Both Summit and Newtowne are privately owned. This being said, if there is ever any problem you deal with kind, grass roots owners that care about their brands and will go out of their way to help you and not unknown customer service reps.
- **\*\*\*SUMMIT TO SEA IS THE ONLY HYPERBARIC BRAND TO HAVE AVAILABLE AN EXCLUSIVE AIR CONDITIONER STYLED AIR COOLER!** This cooler lowers air temperature to 5 degrees below the outside room air temperature.
- "Ocean Bottom Experience." Shine a color-shifting light along the chamber (with emphasis on the blue light) and the white shell changes color, which will be experienced on the inside effectually as being on the bottom of the Sea.
- Summit to Sea just came out with an absolutely stunning infomercial – Featured on Modern Living! The video is posted at this link... Kathy Ireland, illustrious supermodel and actress is now one of the most successful woman entrepreneurs. Summit to Sea chambers are showcased on her TV show "Modern Living." Enjoy!!

**I AM A FULL DISCLOSURE DEALER – I PROMISE TO DISCLOSE EVERY DETAIL OF WHAT YOU ARE PAYING FOR!**

**Be cautious!**

**There are several dealers will offer you unbelievable bundle-price deals!**

Take heed because these unscrupulous dealers will not disclose the full details of the truth about the concentrator

Beware of any offer with low, low price o2 concentrators — it might be:

5 liter, manufacturer discontinued 8 liter or used unit or give you a 1 year and not 3 year warranty

I am available after the sale – I don't disappear!

You'll find many of the same chambers on the internet, but who will offer the best service? Please call around — check attitude ... and then call on me. I have a solid reputation for making your purchase the easiest around. Test me. Call me for my testimonials.

**I will make your purchase a satisfying experience... I promise!**

- I'm newtowne's number one sales rep
- I'm first on summit's distributor list (quantum life force)
- Many facebook mild hyperbaric group members are my customers. And I am highly recommended!

## **Hyperbaric Central: Changing the Way You Heal One Breath at a Time!**

**Michelle Faber: Owner of Hyperbaric Central & YOUR SUPPORT**

I'm not quite the standard Hyperbaric salesman. I represent Hyperbaric Chambers completely because I'm a happy customer myself. Like many of you, I also struggle with health challenges and have gained a great deal of energization and healing from my own chamber. I gravitate toward things that work. So I speak from a personal level. I relate. And I sell only what I believe in. I love helping people. I am not a big ol' business. I'm small & grassroots, much like yourself, and so speaking to me will always be personal. Please check my website out further & let's talk.
